Item 2

Item 3

1. This module will record whether the delivery is a success or failed.
2. **Delivered** will sent the transaction to delivered.
3. **Failed Delivery** must be pressed if the delivery is unsuccessful.
4. Upon clicking, a form will show asking why it is failed to deliver (Drop down: wrong address, no available personnel to receive, others). A text box will also ask for a remark. This information is required. Buttons are **< back** or **okay**. Notify users. Show snackbar
5. This failed delivery will be sent to **Pending** for re-processing. The bgcolor is also different, to indicate that this is a failed delivery
6. The failed delivery attempts will be recorded (Date, time, why it is failed to deliver (Drop down: wrong address, no available personnel to receive, others). A text box will also ask for a remark.). This can be multiple attempts until flag by the user.

Customer Orders (Delivered)

1. You know what this thing is for.

Order Notifications

1. All Order related notifications will be sent here to be used as reference, transaction log etc. (buttons: Sort by date, Sort by type etc.)
